CLINICAL + SYSTEMS
TRANSFORMATION

Our path to smarter, seamless care

Patient
Jaime Tarallo
with newborn
Clea

> After giving birth at BC Women's Hospital + Health Centre, my care team had all my information. For follow-up appointments, they knew about the delayed cord clamping, Clea's weight and her scores. They even knew after we had been to BC Children's Hospital that we had COVID-19. It was great that they had access to all the information and I didn't have to repeat all the details.

– Jaime Tarallo

Through the Clinical & Systems Transformation (CST) project, we will transform health care systems and processes to improve the safety, quality and consistency of patient care. Learn more at:

our.cstproject.ca

A joint initiative of: Vancouver CoastalHealth · Provincial Health Services Authority (Province-wide solutions. Better health.) · Providence Health Care (How you want to be treated.)
